Claims 19-25 are allowed. The Terminal Disclaimer of 28 March 2006 has removed the previous rejection under Obviousness-Type Double Patenting.

The disclosure is objected to because of the following informalities: As noted of record, the objects referred to on page 9 should be called “electrodes”, rather than terminals.

Appropriate correction is required.

Applicant's arguments filed 28 March 2006 have been fully considered but they are not persuasive.

Applicant argues that on pages 9 and 10, the specification describes the terms positive and negative terminals in detail, sufficient to enable these terms to be understood by one skilled in the art. This is not persuasive because the objection is made not because of an insufficiency in detail in describing the “terminals”, but that the term “terminal” is itself incorrect. Applicant is directed to the corresponding sections of his earlier patents. In Patent No. 6,387,562, column 4, starting on line 64, reads, “The negative electrode 11 includes a current collector 11*a*, on each side of which is formed a layer of active material 11*b*.” (emphasis by underline added, bold and italics in original). Patent No. 6,706,080, in column 4, lines 59-61, uses the same language, with the word “electrode”.

This application is in condition for allowance except for the following formal matters:

The incorrect language in the specification, as noted above.

Art Unit: 1745

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
